Fibre King Can Carrier Applicator

- Be one of the first Australian Craft Breweries to reduce your environmental impact.
- Compatible with BioPak and Paktech

BioPak has raised the bar for beer and brought out a new range of carrying rings that are both tree and plastic free made from reclaimed and rapidly renewable sugarcane pulp. They are Australian certified home compostable so will break down in your backyard compost bin. They're also easily recycled in the paper recycling stream, with no plastics in sight.

Fibre King is developing a manual and automatic Can Carrier Applicator that supports both BioPak and Paktech beer rings.

Features:

- Stainless Steel Frame & Components
- Ultra-Compact Design
- 4 & 6 Pack Configurations
- Paktech and Biopak can holders
- 375ml to 500ml Can Heights
- Up to 8000 cans per hour (matching 5 cases/min of Little Packer)
