

## Craft Brewery ‘Little Packer’

➤ Our can specific case packer that is fully automatic, compact, flexible, affordable and reliable, ideal for craft breweries.

Fibre King's latest innovation provides craft brewers with a compact, affordable can case packer. The 'Little Packer' (RSC EL casepacker) packs beer cans into an end load RSC carton ready for distribution. Cans can be in either four or six-pack clusters, with the option to pack loose cans, and can run both 24 and 16 can cartons and glue the boxes with no manual support.

At Fibre King, we don't just build machines – we engineer peace of mind. Call us on **+61 7 3293 8800** to see how we can help you.

# Little Packer Features

Fibre King's latest innovation provides craft brewers with a fully automatic compact, affordable can case packer. The 'Little Packer' (RSC EL casepacker) packs beer cans into an end load RSC carton ready for distribution. Cans can be in either four or six-pack clusters, with the option to pack loose cans, and can run both 24 and 16 can cartons and glue the boxes with no manual support.

Fibre King works closely with the craft brewery industry and has developed specialised packaging equipment to cater for their specific needs that include space constraints, simple operation, reliability and affordability.

## Speeds

Up to 5 cases per minute.

## Can Sizes

375ml and 500ml cans

## Cluster Options

4 or 6 pack clusters with an option to pack loose cans.

## Carton Options

Ability to run 6 packs clusters in 24 can cartons and 4 pack clusters in 24 and 16 can cartons with a simple manual change over. Change over time is approximately 10 minutes.

## Size

1.2m x 1.2m. Extremely compact design. Can fit into existing manual packing space.

## Automatic

Fully automatic operation

## Controls

PLC controlled for robust and repeatable operation.

## Quick Payback

Budget friendly case packer for quick payback, providing excellent return on investment.

## Ease of use

Easy operator and maintenance access.

## Safe - Robust guarding

Electrical interlocking to Australian and International standards. Give your staff the best protection and quick access for setup, maximising uptime.

## Reliability and Spare Parts Availability

Only tried and tested proprietary items are used in our machines, ensuring reliable performance and immediate availability of spare parts.

## Australian Standard

Built to Australian safety standards.

## Fully Installed

Full installation and training provided to ensure minimal downtime.

**Heavy Duty Construction**

For use in 24 hour per day production environments.

**Product Changeover**

Allows for quick and accurate changeovers for 330ml to 500ml can sizes.

**Compact Design**

Allows the machine to operate within a small footprint.

**Product Infeed**

Standard machine accepts 4 pack and 6 pack clusters.

**FIBRE KING**

**FIBRE KING**

**FIBRE KING**

**Guarding AS4024.1**

Fully interlocked doors to assist access and visibility.

**Hot Melt Adhesive System**

For lower cost of operation over other sealing methods.

# The Fibre King Difference

## > More Uptime

Fibre King works closely with customers to understand their specific requirements and collaborate to develop a solution that exceeds production expectations. Our equipment combines practical design, robust manufacturing and simple operation providing our customers with a thoroughly reliable machine built to endure constant, rigorous use. Changeovers happen quickly and seamlessly; we build in easy access for maintenance and upgrades. Our remote monitoring, PLC programming and service standards are such that some of the world's biggest companies choose Fibre King as their preferred supplier.

## > Lower Overall Cost of Use

Fibre King uses the best technology available combined with over 90 years of engineering experience to build machines with both the operator and maintenance team in mind ensuring less operator intervention is needed and offering easy maintenance access. Our equipment is designed to be able to integrate with existing production lines as well as being adaptable as requirements change over time. Fibre King has proven results for providing reliable, high quality machinery that stands the test of time with machines in full operation 30 years on. Our solutions provide reduced direct labour costs, improved productivity, increased product quality, increased capacity, and reduced risk of injury.

## > 'No Excuses' Service

Your investment in a Fibre King machine is backed by our full service warranty, operator training and ongoing support. We're on hand to make sure your production line is working at maximum capacity from the date of commissioning, no matter what it takes. Sophisticated remote access means we can monitor performance of our equipment anywhere around the world, and provide immediate technical assistance.

**It was easy to deal with Fibre King as a local manufacturer who delivered a great system and continues to offer fantastic after sales service."**
